VOLUNTEERS NEEDED

For a Transcranial Magnetic Stimulation (TMS) Study of Reading

Get paid to participate in research!

The TMS Reading Study at the joint GSU/GT Center for Advanced Brain Imaging (CABI) is looking for healthy volunteers to participate in a study looking to better understand how the reading system in the brain functions.

Qualifications:
- Male or female, ages 18 to 50
- Native English speaker
- Right-handed
- No permanent metal in or on body
- No pacemaker, cochlear implant, permanent hearing aid
- Not claustrophobic
- Healthy (no heart or neurological diseases, history of seizures, other organ failure, sickle cell anemia, high or low blood pressure)

Study Includes:
- Reading and reading-related tests lasting up to 1.5 hours per session
- 2 fMRI brain scan sessions lasting up to 1.5 hours
- 1 TMS session lasting up to 45 minutes
- Reading sessions can be done virtually and/or at CABI
- TMS and fMRI sessions will take place at CABI
- Visits will be done over the course of 2 visits on different days

Receive up to $75, based on number of sessions completed (minimum $10)
